New Orleans papers to the 29th of Mayfour days before the outbreak-give but slight indications of the Committee of Vigilance or, ganization. The Delta, the organ and advocate of fillibusters and slave-traders, hints at such a Committee, that is all. City polities doubtless have something to do with the organization, though it is stated that the Vigilance Committee is composed of all parties. For two years the city government has been under the control of the American party, and the municipal election takes place to-day, the 7th. The Americans identified with the city government, had resolved to run Gerard Stith for Mayor, though the move was not sanctioned by the Executive Committee of the American party. Stith's faction was made up of the fighting bullies and rabble of the city, the men who had become the terror of peacoable citizens. To put down this party Major Beauregard, of the Topographical Engineers, a man of energy and integrity, was asked to head an Independent ti ket, and was nominated for Mayor on the 26th ult. At the latest accounts but few lives had been lost, but a call had been issued to the Americans to resist the authority of the Vigilance Committee, and meendiary speeches were being made. Further troubles were unticipated, and we shall be happily disappointed if the ection to-day passes off without terrible riots and bloodshed.
